## C. Research Experience

- 2009-2010** Collaboration with Dr. Saif Abed at St Georges Hospital, London, to measure and define the morphometric and geometric relationships between key orbital surgical landmarks in formalin fixed cadavers. The research was co-supervised by Mr. J. Uddin and Dr. P. Addis and the findings have been published in several peer reviewed journals, presented at national and international meetings and received several prizes.
- 2006- 2008** Clinical research aimed at developing a quantitative method of assessment of the optical quality of the crystalline lens in vivo by calculating the relationship between its modulation transfer function, using the OQUAL™ device, and visual acuity. (see presentations below). Institute of Ophthalmology, Imperial College and Chelsea and Westminster Hospital, London. Supervisors Mr. Nigel Davies, Mr. Ian Murdoch and Dr. Robert S Weale.
- 1995-1996** Bachelor of Science Degree in Anatomy and Basic Medical Sciences, University of London. Supervisor Dr. J. Cohen. Department of Developmental and Degenerative Neurobiology. Guy's Hospital, London. This laboratory based research was carried out using tissue culture and immunopanning techniques to study the effects of multiple neurotrophic factors and the extracellular matrix on retinal ganglion cell survival and neurite outgrowth in vitro. *PDF copy of thesis is available.*
